## **Customized Solutions**

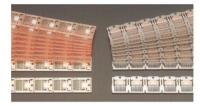

## **Auto-Conveying Blast Cabinet**

**Application: Surface treatment of lead frame, semiconductor parts and various electronic components** 

--Parts are manually loaded at entry bay and automatically conveyed into the cabinet for automatic blasting on single/both sides of the workpiece.

Lead frame deflashing

- 8 blast guns: 4 guns on each side of the blasting chamber to provide simultaneous surface treatment
  - Airblows workpiece prior to exit to rid surface dust
    - Workpiece entry is controlled via a speed inverter (1:100).

8 Guns simultaneous double side blasting

3 Guns single side blasting

## **Options**

- Stainless steel structure
- PLC controls for more automation flexibility
- Wet-deflashing version available
