

Application: Blasting of toner shafts or printer rollers

--Our Auto-Roller Blast Cabinet is specifically designed for tubular work pieces. Equipped with PLC controls to monitor speed & time, the multi-gun horizontal oscillation is carefully engineered to ensure uniform blasting.

- Robust roller shaft construction with PU sleeves
- Horizontal oscillation blast guns motioned by linear motion modules
 - Automatic airwash function
 - 1 touch button auto-blasting, requires only loading of work pieces
- PLC controls gun motion speed, time, blast pressure, workpiece rotation
- High efficiency cyclone for recovery of fine media
- US Donaldsson Ultra Web Filter cartridge with reverse air pulse

6 gun configuration for blasting 6 rollers
