

## Our ComPAK Suction Blast Cabinets

All our ComPAK dryblast cabinets are constructed of high quality steel sheets and materials. We design the ComPAK series with an all in 1 concept integrating the blasting chamber, dust collector and cyclone in 1 compact cabinet.

large bright interior

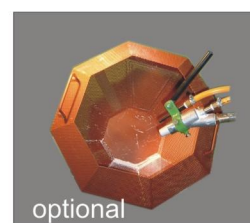

Dust Bag Dust Collector

optional  
Cartridge Dust Collector

optional  
Turntable Trolley

optional  
Motorized Basket

### ComPAK Airblast Features

- Economical system for general blasting
- Compact and ergonomic design ensures saving of space and usage. Simply connect to your air and electric supply
- Superior quality construction combined with outstanding reliability guarantees years of satisfaction
- Conveniently angled large window and illumination allows high visibility

We also offer many options to meet our customers requirement. Eg. cartridge filter, turntable, turntable with trolley, motorized rotating basket, door tunnels for pipe blasting, boron carbide nozzle, gun holder, safety switch, etc
